Guide for authors

1. Our journal accepts unpublished and state-of-the-art papers. All papers must be submitted with a cover letter stating it is an unpublished article which is not undergoing current publishing processes elsewhere. It should also specify that all authors agree with contents therein and they give the publishing rights to Revista Facultad de Ingeniería (REDIN) from Universidad de Antioquia.

In the cover letter, the authors must provide the following information: Signature, Name, Academic degree, Institutional affiliation, E-mail, Areas of Interest, ORCID, Identification number, Nationality

2. Research papers should not exceed 20 Letter-sized pages written with 12-pt. Times New Roman font in single space, and with symmetric margins of 2,5 cm. All lines of the paper must be numbered to facilitate the reviewing process. All papers shall contain: title in English (Maximum 15 words) and Spanish, abstract (maximum 230 words) in English and Spanish, keywords (maximum 5 words) in English and Spanish, introduction, experimentation, results and discussion, conclusions, acknowledgements (optional), and references. tables and figures must be inserted and placed along the text.

State-of-the-art papers should preferably not exceed 30 Letter-sized pages written with 12-pt. Times New Roman font in single space, and with symmetric margins of 2,5 cm. All papers shall contain: title in English and Spanish, abstract in English and Spanish, keywords in English and Spanish, introduction, subject development, conclusions, acknowledgements (optional), and references. Tables and figures taken from other sources must be referenced in footnote. The main author of a state-of-the-art paper must relate five publications of his own on the same subject in the cover letter and copyright transfer agreement. Tables and figures must be inserted and placed along the text. State-of-the-art papers may have a maximum of five self-citations in the last five years and must report at least 50 references.

In order to standardize the keywords and improve the visibility of the articles published in the Journal, it is suggested the use of the Thesaurus tool to select appropriately these words (maximum 5 words). Similarly, as far as possible, title tags should not be repeated in keywords.

Authors using Word format may download this template

Authors using a LATEX format may download these templates and follow the guidelines.

To compile in XeLatex, no other compilers should be used.

The .bib file sent by redin- shall be used.

The IEEETran bibliography style shall be used, and citations must be numbered sequentially.

Upon request, please send the .tex files during the style

process.

Use Eqref to cite the equations in label, the floating files as Fig1, Fig2.

In case of generating figures using TKIZ package, please attach figures individually in PDF format.

At the end of each paragraph, use a line break.

3. The Editorial Board reserves the right to make adjustments to the paper in order to preserve the style of the journal.

4. Authors should provide the next information: citation name (in the paper), ORCID, mailing address, e-mail, work institution, and phone number including country code. This contact author must have the consent from all authors for publishing the paper.

5. The contact author is responsible for communicating with the journal and must include those who contributed as authors, to ensure that all authors agree with the contents of the paper and that all changes made (e.g. order of appearance for the authors, addition or deletion of authors) have been approved by each author. The contact author is also responsible for informing the co-authors on the state of the paper before and after publishing. The concept of author in the scientific publications is applied to those who write the original and, at the same time, contribute significantly to the research development. To be listed as author implies to accept public responsibility for the contents of the paper.

6. Papers should be submitted only through the Journal's website, following the instructions on the software.

7. Special instructions for typing:

a. Text should be typed without format, in Times New Roman, 12 pt.

b. Paragraphs must be justified, without line spacing between them and without splitting words.

c. A single space should be used between words, as well as after a comma, colon, semi-colon, parenthesis, and period.

d. To add a line break at the end of the paragraph.

e. Please write dashes next to the attached word, and prefer hyphens without a space when connecting two words or numbers (e.g. physical-chemical, 1999-2000.)

For equations, use the MathType equation editor, which can be downloaded for free from the WEB. This application has the same use as any equation editor. Select Cambria Math font, size 14, using the options Style/define/Cambria Math/Apply and Size/define/full 14/Apply. Copy and paste the equation to Word

f. Figures, Tables and Equations (use the complete words) should be cited in the paper, in strict order and should have a footnote with a descriptive title. Photographs, charts, and maps are to be referred to as

figures.

g. Figure captions should be typed as a normal paragraph outside and below the image. Figures should be submitted as single additional files in their original format, different from the submitted manuscript file, uploaded one by one to the OJS system as supporting files as the same way as the letter. To ensure visual quality, set images resolution at 350 dpi; they should be at least 8.5 cm wide and not exceed 17cm. They must contain the file name numbering to identify its location in the document in PDF, PNG or JPG formats.

h. The text for the figures should be Times New Roman, 11 pt.

i. Uppercase must not be used in the figure captions.

j. Pictures should not be included; only tables, which should be automatically created using the word processor without fillets. Tables should not duplicate results presented elsewhere in the paper, for example in figures.

k. Decimals should be written with a dot (.), thousands and millions should be written with a comma (,).

l. SI units, dimensions, and symbols must be used.

m. Figures may be colored, but the author must be aware that printing will be made in gray scale.

n. Quoted bibliographical references are to be inserted within the text, using a number in brackets at the level of the text, and separated with a space from the previous word. At the end, references are numbered in that exact ascending order. [1-4], [3,5,8]. You should avoid naming the authors in the citations, it could be written at the end of the idea.

o. All equations should be numbered in sequential order.
