Revista Facultad de Ingeniería Universidad de Antioquia

A

Accident prevention

Pedestrian gaps and walking speed at uncontrolled midblock crosswalks/ F. A. Guío-Burgos, M. J. Combariza-Pinzón and F. A. Cerquera-Escobar// redin-Revista Facultad de Ingeniería. No. 107. (Apr-Jun); pp. 26-38.

Aerodynamics

Aerodynamic investigation of extremely efficient vehicles under side wind conditions/ A. Yudianto, M. Solikin, S. Sutiman, Z. Arifin, I. Wayan-Adiyasa, A. Yudantoko// redin-Revista Facultad de Ingeniería. No. 109. (Oct-Dec); pp. 79-88.

B

Biogas

Synergistic and antagonistic effects in anaerobic co-digestion. Analysis of the methane yield kinetics/ N. B. Montesdeoca-Pichucho, K. G. Alcívar, R. J. Baquerizo-Crespo, Y. Gómez-Salcedo, O. Pérez-Ones and I. Pereda-Reyes// redin-Revista Facultad de Ingeniería. No. 107. (Apr-Jun); pp. 80-87.

Bioimpedance

A modified voltage changes ratio (MVCR) for in-vitro volume estimation/ V. H. Mosquera-Leytona and C. F. Rengifo-Rodas// redin-Revista Facultad de Ingeniería. No. 108. (Jul-Sep); pp. 33-40.

Building materials

New concrete masonry solid block with non-conventional geometry: Experimental characterization/ M. F. Vargas and J. Carrillo// redin-Revista Facultad de Ingeniería. No. 106. (Jan-Mar); pp. 36-46.

C

Cattle manure

Effect of nutrients, inoculum and co-substrates on methane potential of cattle manure/ R. C. Ruíz-Bastidas, L. S. Cadavid-Rodríguez// redin-Revista Facultad de Ingeniería. No. 108. (Jul-Sep); pp. 41-53.

Chained masonry wall

Seismic behavior of reinforced concrete buildings using chained masonry walls randomly located/ A. Nour and A. Benanane and V. Humberto// redin-Revista Facultad de Ingeniería. No. 107. (Apr-Jun); pp. 102-112.

Clay soils

Mapping of clay soils by remote sensing in the area of Mers El Kébir, Algeria/ F. Rahal and F. Z Baba-Hamed// redin-Revista Facultad de Ingeniería. No. 109. (Oct-Dec); pp. 9-16.

Coastal zones

Subgrade soil stabilization using marine debris: A literature review/ S. P. Muñoz-Pérez and J. G. Aguilar-Morante and I. P. Díaz-Flores// redin-Revista Facultad de Ingeniería. No. 109. (Oct-Dec); pp. 25-34.

Computational fluid dynamics

Analysis and hydraulic improvement of a maturation pond using Computational Fluid Dynamics/ L. Velázquez-Araque and J. Chica// redin-Revista Facultad de Ingeniería. No. 109. (Oct-Dec); pp. 56-68.

E

Energy conversion

Development of a flexible anode for lithium-ion batteries from electrospun carbon-magnetite composite microfibers/ C. A. Velásquez, F. A. Vásquez, M. Álvarez-Láinez, A. F. Zapata-González and J. A. Calderón// redin-Revista Facultad de Ingeniería. No. 106. (Jan-Mar); pp. 94-102.

Enteropathogenic bacteria

ZnO/TiO_2 and ZnO/Nb_2O_5 as effective systems for the treatment of enteric bacteria and commercial dyes/ J. S. Hernández, J. J. Murcia, H. Rojas, M. C. Hidalgo, J. A. Navío// redin-Revista Facultad de Ingeniería. No. 108. (Jul-Sept); pp. 9-17.

F

Favre averages

The energy equation for modeling reacting flows on RANS, LES and DES approaches/ L. F. Gutiérrez-Marcantoni, J. P. Tamagno and S. A. Elaskar// redin-Revista Facultad de Ingeniería. No. 107. (Apr-Jun); pp. 131-140.

Fibrous reinforcements

New approach for filling simulations of dual-scale preforms using BEM for the manufacturing of composites materials/ I. D. Patiño-Arcila// redin-Revista Facultad de Ingeniería. No. 107. (Apr-Jun); pp. 66-79.

Fluid mechanics

Influence of the pectin and cellulose on the performance of cross-flow microfiltration/ H. L. Gallego-Ocampo, K. J.

Ortega Villalba, C. A. Vélez-Pasos and R. J. Rojas-Alvarado// redin-Revista Facultad de Ingeniería. No. 109. (Oct-Dec); pp. 108-119.

M

Mining

Rapid assessment of mercury-contaminated sites through the Toxic Site Identification Program (TSIP). Colombia/ A. T. Ortega-Ramírez, A. Rodríguez, D. F. Martín-Maldonado, L. Hernández, C. Espinosa, G. Binkhorst and J. S. Keith// redin-Revista Facultad de Ingeniería. No. 109. (Oct-Dec); pp. 48-55.

Mucilage

Reducing sugars degradation in cocoa mucilage to produce bioethanol/ J. Villarroel-Bastidas, G. Del C. Angulo-Ortega and J. Briones-Bitar// redin-Revista Facultad de Ingeniería. No. 108. (Jul-Sep); pp. 98-106.

N

Nanocomposites

Comparative assessment of computational models for the effective tensile strength of nano-reinforced composites/ M. Duarte-García, I. D. Patiño-Arcila, C. A. Isaza-Merino// redin-Revista Facultad de Ingeniería. No. 108. (Jul-Sep); pp. 115-123.

Nanolubricants

Effect of addition of MWCNTs to a mineral lubricant on Diesel engine performance/ S. Meneses-Múnera, J. A. Carlos-Cornelio, A. Cadavid-Sierra, J. S. Rudas, M. I. Ardila-Marín, A. O. Toro and L. M. Hoyos-Palacio// redin-Revista Facultad de Ingeniería. No. 109. (Oct-Dec); pp. 17-24.

O

Open data

Quality study of open government data related to COVID-19 in Latin America/ R. Martínez, C. Pons, R. Rodríguez and P. Vera// redin-Revista Facultad de Ingeniería. No. 108. (Jul-Sep); pp. 18-32.

P

Photocatalysis

Photocatalytic treatment based on TiO_2 for a coal mining drainage/ J. J. Murica-Mesa, C. G. Patiño-Castillo, H. A. Rojas-SArmiento, A. Navío-Santos and M. del C. Hidalgo-López and A. Ángel-Botero// redin-Revista Facultad de Ingeniería. No. 107. (Apr-Jun); pp. 88-101.

Photovoltaic inverters

Effective grid connection approach for an overshot waterwheel/ V. Leite// redin-Revista Facultad de Ingeniería. No. 108. (Jul-Sep); pp. 67-80.

Pico-hydro systems

Design of a smart microgrid with small-scale hydro generation: a practical case study/ V. Leite// redin-Revista Facultad de Ingeniería. No. 106. (Jan-Mar); pp. 78-93.

Pipe Bridge

Pipe bridge design optimisation through a comparative study of truss and girder arrangements/ S. V. Sivapriya, S. Sadhana, N. Prathibha and S. Saranya// redin-Revista Facultad de Ingeniería. No. 106. (Jan-Mar); pp. 56-65.

Pollution variation

Understanding the atmospheric characteristics of high polluted events in a tropical megacity/ A. Casallas, T. Córdoba, L. Sánchez-Cárdenas, M. A. Guevara-Luna, and L. C. Balalcázar// redin-Revista Facultad de Ingeniería. No. 106. (Apr-Jun); pp. 53-65.

Process assurance model

Development of a management model of support services in biotechnology companies/ D. Padilla-Aguiar, J. A. Acevedo-Suárez, A. J. Urquia-Rodríguez, A. J. Acevedo-Urquiaga and N. Sablón-Cossío// redin-Revista Facultad de Ingeniería. No. 106. (Jan-Mar); pp. 25-35.

Reactor

Evaluation of a sequential batch reactor implementing mixing and aeration by recirculation through a Venturi/ Y. E. Sambony-Ordoñez, M. J. Molano-Galíndez, C. C. Cabezas-Córdoba, S. Montenegro-Arboleda// redin-Revista Facultad de Ingeniería. No. 108. (Jul-Sep); pp. 107-114.

S

Seismic performance

Optimal design and performance evaluation of tuned mass damper inerter in building structures/ D. Caicedo, L. Lara-Valencia and J. Blandón// redin-Revista Facultad de Ingeniería. No. 106. (Jan-Mar); pp. 66-77.

Soil desaturation

Numerical analysis of soil desaturation by an air injection method/ S. Sepúlveda-Cano, C. A. Vega-Posada and E. F. García-Aristizábal// redin-Revista Facultad de Ingeniería. No. 107. (Apr-Jun); pp. 39-52.

Soil mechanics

A mechanical model to determine upheaval buckling of buried submarine pipelines/ P. Teixeira, M. A. González, C. Graciano and C. A. Vega-Posada// redin-Revista Facultad de Ingeniería. No. 106. (Jan-Mar); pp. 47-55.

Soil pollution

Potential ecological risk index for metals in a grazing area, Guasca, Cundinamarca/ M. A. Barriga-Vélez and L. C. Ramírez-Vargas, E. A. López-Barrera and C. A. Peña-Rincón// redin-Revista Facultad de Ingeniería. No. 106. (Jan-Mar); pp. 103-112.

Solar energy

Validation of an outdoor efficiency model for photovoltaic modules/ L. D. Murillo-Soto and C. Meza// redin-Revista Facultad de Ingeniería. No. 108. (Jul-Sep); pp. 54-66.

Static Liquefaction

Effects of initial stress anisotropy on the onset of undrained instability for Guamo sand/ A. M. Ramos-Cañón, L. F. Prada-Sarmiento and J. Camacho-Tauta// redin-Revista Facultad de Ingeniería. No. 109. (Oct-Dec); pp. 69-78.

T

Teleoperation

User study of sensorless adaptive haptic assistance for bilateral teleoperation/ T. Ring and J. Sofrony// redin-Revista Facultad de Ingeniería. No. 108. (Jul-Sep); pp. 81-97.

Topology optimization

Multiobjective topology optimization of planar trusses using stress trajectories and metaheuristic algorithms/ L. H. Niño-Álvarez and O. J. Begambre-Carrillo// redin-Revista Facultad de Ingeniería. No. 107. (Apr-Jun); pp. 9-25.

Traffic accident

Uncovering road traffic crashes typologies using multiple correspondence analysis (MCA), in low-resource settings/ C. Domínguez, m J. D. Febres-Eguiguren and S. N. Cuadra// redin-Revista Facultad de Ingeniería. No. 107. (Apr-Jun); pp. 113-130.

Transportation logistics industry

Study on Transportation Logistics Industry development under economics: The case of HCM, Vietnam/ A. M. Ramos-Cañón, L. F. Prada-Sarmiento and J. Camacho-Tauta// redin-Revista Facultad de Ingeniería. No. 109. (Oct-Dec); pp. 89-107.

U

Unit tests

Search-based reduction model for unit testing/ P. B. Fernández-Oliva, A. M. Güemes-Esperón, M. D. Delgado-Dapena and A. Rosete// redin-Revista Facultad de Ingeniería. No. 109. (Oct-Dec); pp. 35-47.

W

Water pollution

Water quality trend analysis of Cheurfas II dam, Algeria/ S. Rezak, F. Rahal and A. Bahmani// redin-Revista Facultad de Ingeniería. No. 106. (Jan-Mar); pp. 9-24.

Water treatment

Indirect electrochemical degradation of acetaminophen: process performance, pollutant transformation, and matrix effects evaluation/ E. A. Serna-Galvis, J. E. Ramírez, R. E. Palma-Goyes and R. A. Torres-Palma// redin-Revista Facultad de Ingeniería. No. 106. (Jan-Mar); pp. 113-123.

Guide for authors

1. Our journal accepts unpublished and state-of-the-art papers. All papers must be submitted with a cover letter stating it is an unpublished article which is not undergoing current publishing processes elsewhere. It should also specify that all authors agree with contents therein and they give the publishing rights to Revista Facultad de Ingeniería (REDIN) from Universidad de Antioquia.

In the cover letter, the authors must provide the following information: Signature, Name, Academic degree, Institutional affiliation, E-mail, Areas of Interest, ORCID, Identification number, Nationality

2. Research papers should not exceed 20 Letter-sized pages written with 12-pt. Times New Roman font in single space, and with symmetric margins of 2,5 cm. All lines of the paper must be numbered to facilitate the reviewing process. All papers shall contain: title in English (Maximum 15 words) and Spanish, abstract (maximum 230 words) in English and Spanish, keywords (maximum 5 words) in English and Spanish, introduction, experimentation, results and discussion, conclusions, acknowledgements (optional), and references. tables and figures must be inserted and placed along the text.

State-of-the-art papers should preferably not exceed 30 Letter-sized pages written with 12-pt. Times New Roman font in single space, and with symmetric margins of 2,5 cm. All papers shall contain: title in English and Spanish, abstract in English and Spanish, keywords in English and Spanish, introduction, subject development, conclusions, acknowledgements (optional), and references. Tables and figures taken from other sources must be referenced in footnote. The main author of a sate-of-the-art paper must relate five publications of his own on the same subject in the cover letter and copyright transfer agreement. Tables and figures must be inserted and placed along the text. State-of-the-art papers may have a maximum of five self-citations in the last five years and must report at least 50 references.

In order to standardize the keywords and improve the visibility of the articles published in the Journal, it is suggested the use of the Thesaurus tool to select appropriately these words (maximum 5 words). Similarly, as far as possible, title tags should not be repeated in keywords.
Authors using Word format may download this template

Authors using a LATEX format may download these templates and follow the guidelines.

To compile in XeLatex, no other compilers should be used.
The .bib file sent by redin- shall be used.
The IEEETran bibliography style shall be used, and citations must be numbered sequentially.
Upon request, please send the .tex files during the style process.
Use Eqref to cite the equations in label, the floating files

as Fig1, Fig2.
In case of generating figures using TKIZ package, please attach figures individually in PDF format.
At the end of each paragraph, use a line break.
3. The Editorial Board reserves the right to make adjustments to the paper in order to preserve the style of the journal.

4. Authors should provide the next information: citation name (in the paper), ORCID, mailing address, e-mail, work institution, and phone number including country code. This contact author must have the consent from all authors for publishing the paper.

5. The contact author is responsible for communicating with the journal and must include those who contributed as authors, to ensure that all authors agree with the contents of the paper and that all changes made (e.g. order of appearance for the authors, addition or deletion of authors) have been approved by each author. The contact author is also responsible for informing the co-authors on the state of the paper before and after publishing. The concept of author in the scientific publications is applied to those who write the original and, at the same time, contribute significantly to the research development. To be listed as author implies to accept public responsibility for the contents of the paper.

6. Papers should be submitted only through the Journal's website, following the instructions on the software.

7. Special instructions for typing:

a. Text should be typed without format, in Times New Roman, 12 pt.

b. Paragraphs must be justified, without line spacing between them and without splitting words.

c. A single space should be used between words, as well as after a comma, colon, semi-colon, parenthesis, and period.

d. To add a line break at the end of the paragraph.

e. Please write dashes next to the attached word, and prefer hyphens without a space when connecting two words or numbers (e.g. physical-chemical, 1999-2000.)

For equations, use the MathType equation editor, which can be downloaded for free from the WEB. This application has the same use as any equation editor. Select Cambria Math font, size 14, using the options Style/define/Cambria Math/Apply and Size/define/full 14/Apply. Copy and paste the equation to Word

f. Figures, Tables and Equations (use the complete words) should be cited in the paper, in strict order and should have a footnote with a descriptive title. Photographs, charts, and maps are to be referred to as figures.

g. Figure captions should be typed as a normal paragraph outside and below the image. Figures should be submitted as single additional files in their original format, different from the submitted manuscript file, uploaded one by one to the OJS system as supporting files as the same way as the letter. To ensure visual quality, set images resolution at 350 dpi; they should be at least 8.5 cm wide and not exceed 17cm. They must contain the file name numbering to identify its location in the document in PDF, PNG or JPG formats.

h. The text for the figures should be Times New Roman, 11 pt.

i. Uppercase must not be used in the figure captions.

j. Pictures should not be included; only tables, which should be automatically created using the word processor without fillets. Tables should not duplicate results presented elsewhere in the paper, for example in figures.

k. Decimals should be written with a dot (.), thousands and millions should be written with a comma (,).

l. SI units, dimensions, and symbols must be used.

m. Figures may be colored, but the author must be aware that printing will be made in gray scale.

n. Quoted bibliographical references are to be inserted within the text, using a number in brackets at the level of the text, and separated with a space from the previous word. At the end, references are numbered in that exact ascending order. [1-4], [3,5,8]. You should avoid naming the authors in the citations, it could be written at the end of the idea.

o. All equations should be numbered in sequential order.

8. References according to document type
